Product sheet

White membrane type F, JUNKERS

Brand: JUNKER

Reference: GIB 000978

51 mm white membrane, ideal for heating systems. Its specialized design ensures efficient and reliable performance, adapting to a variety of applications in both domestic and commercial settings, contributing to the proper functioning of the water heating system.

Description

The Junkers Type F white membrane is an essential component for the efficient operation of water heaters. Specifically designed to guarantee optimal performance, this membrane ensures a constant and stable water flow, contributing to the proper functioning of the heating system. Its design and manufacturing meet the most demanding quality standards, making it a reliable choice for water heater maintenance.

- Diameter: Ø 51 mm
- Type: F
- Compatibility: Designed for use in Junkers heater water bodies
- Material: Made of high-strength materials to ensure durability and efficiency
- Function: Regulates water flow in the heating system, ensuring optimal performance
- Installation: Easy to install, designed for a precise fit in the corresponding system
- Quality: Meets the highest quality standards to ensure safe and reliable operation
