Description

The Junkers Viejo Micro lower gland is a fitting specifically designed for polyethylene pipes. This component is essential to guarantee the continuity, connection, direction, and branching of pipes, ensuring efficient and safe flow in water or gas conduction systems.

- Body and nut made of polypropylene (PP), providing durability and corrosion resistance.
- Rubber O-ring that guarantees maximum tightness, preventing leaks and ensuring a hermetic seal.
- Polypropylene gland gasket that contributes to the stability and safety of the piping system.
- Conical acetic resin bushing, designed to facilitate assembly and ensure a firm and secure connection.
- Available in diameters ranging from Ø20mm - 1/2 to Ø25 - 3/4, adapting to various installation needs.
