Thermocouple 320mm Junkers, JUNKER

Brand: JUNKER

Reference: GIB 013033

A 320 mm device designed for heating systems, made with high-quality materials that ensure accurate temperature measurements. Its standard length allows for easy installation on a variety of equipment, offering reliable and long-lasting performance in both industrial and domestic environments.

Description

The Junkers 320 mm thermocouple is an essential component in gas heating systems and water heaters. Designed to ensure safe and efficient operation, this generic thermocouple is compatible with a wide range of models, providing a reliable solution for pilot light control. Its robust construction and 320mm length make it suitable for various applications, ensuring simple installation and long-lasting performance.

- Total length: 320mm, suitable for multiple heating equipment configurations.
- Compatibility: Compatible with a variety of Junkers brand water heaters and gas heating systems models.
- Material: Made of high-quality materials that guarantee durability and resistance to high temperatures.
- Connection: Equipped with a standard connection that facilitates its installation and replacement in existing systems.
- Function: Designed to detect the presence of flame in the pilot light, ensuring gas is cut off in the event of accidental flame extinction.
- Safety: Contributes to the safety of the system by preventing gas leaks, thanks to its fast and accurate response capacity.
- Application: Used in heating systems and gas water heaters, providing efficient and safe control of the on.
