Description

The Junkers green valve is an essential component for the correct operation of water heaters. Specifically designed to ensure efficient and safe starting, this valve integrates seamlessly into heating systems, ensuring optimal performance and a long lifespan of the equipment.

- **Compatibility:** Designed to be compatible with a wide range of Junkers heater models, ensuring simple and hassle-free installation.
- **Material:** Made from high-quality materials that guarantee corrosion resistance and durability under intensive use.
- **Color:** Green, making it easy to identify and check during maintenance or installation.
- **Function:** Controls gas flow to allow safe heater startup, preventing leaks and ensuring efficient ignition.
- **Dimensions:** Compact and lightweight, designed to fit into tight spaces without compromising functionality.
- **Installation:** Simple installation process that does not require specialized tools, making maintenance and installation easier Replacement.
- **Certification:** Complies with current safety and quality regulations, ensuring safe and reliable use.

Specifications

Colour	Green

EAN	8432453040654
