Large rectangular box, ABRISA

Brand: ABRISA

Reference: GIB 001151

Rectangular structure designed for irrigation systems, ideal for protecting essential components such as solenoid valves. Made of reinforced polypropylene, it offers weather resistance and a secure locking system. Its design allows easy access and inspection of the interior, ensuring functionality and durability in demanding environments.

Description

The large rectangular manhole is an efficient solution for irrigation installations, specifically designed to house and protect essential components such as solenoid valves and shut-off valves. Made from high quality materials, this manhole cover guarantees durability and resistance in various environmental conditions.

- Material: Reinforced polypropylene (PP), which offers excellent resistance and durability.
- UV resistant, ensuring that the material does not degrade with prolonged sun exposure.
- Easy to embed design, with a cover that is housed inside for a simple and secure installation.
- Top cover that allows a quick and easy inspection of the interior, facilitating maintenance.
- Incorporates an anti-vandal lock for greater security and protection against unauthorized access.
- Includes a plastic Allen key for operating the lock, ensuring controlled access.
- Non-slip surface, which provides additional security in wet or slippery environments.
- Dimensions: 420x320x200 mm, offering adequate space for various configurations.
- Capacity to accommodate 4 small or 2 large solenoid valves, adapting to different installation needs.
- Number of outputs: 6, allowing versatile and efficient connection of irrigation systems.
