Static Diffuser - 1/2", ABRISA

Brand: ABRISA

Reference: GIB 004738

This emitter is designed to distribute water evenly in a fan pattern, allowing for precise adjustment of the outlet angle. Its efficient filtration system facilitates cleaning and maintenance, ensuring optimal performance in irrigation applications. Ideal for optimizing water management in crops.

Description

The 1/2" static emitter is a device designed for efficient water distribution in irrigation systems. Its design allows for even fan-shaped distribution, making it suitable for a variety of irrigation applications. This static emitter is characterized by its adjustability and ease of maintenance, ensuring optimal performance at all times.

- Adjustable irrigation angle from 0° to 360°, allowing customized coverage according to the needs of the area to be irrigated.
- It incorporates an anti-drain valve that prevents the system from emptying, maintaining pressure and avoiding water waste.
- It does not include an adjustment screw on the nozzle, simplifying its use and reducing the necessary maintenance.
- Equipped with a large filter that retains dirt, making it easy to clean and prolonging the life of the diffuser.
- Flow capacity of up to 700 liters per hour, ensuring an adequate supply of water for different types of Vegetation.
- Available for bulk sale, allowing for large quantities for larger projects.
