Link C/Security Ring Bag 100 Units - 20mm, ABRISA

Brand: ABRISA

Reference: GIB 001272

Made of polyethylene, this fitting allows for efficient connection of pipes in drip irrigation systems. Its design incorporates safety rings that optimize pressure resistance, ensuring reliable and long-lasting performance in a variety of environmental conditions. Ideal for agricultural and gardening applications.

Description

The safety ring coupling is an essential component for joining pipes in drip irrigation systems. Designed to provide a secure and durable connection, this product is ideal for applications requiring high pressure resistance. Made with quality materials, it guarantees optimal performance in various conditions.

- Material: Polyethylene (PE), known for its durability and corrosion resistance.
- Includes safety rings that provide greater resistance against pressure, ensuring the stability of the connection.
- Easy installation, allowing quick and simple integration into existing irrigation systems.
- Color: Available in combinations of black and red or green, facilitating identification and organization in the irrigation system.
- Available in various sizes to adapt to different needs and pipe configurations.
- Presented in a bag of 100 units, ideal for large-scale projects or to always have spare parts on hand.
- EAN13 code: 8432453012729, for easy identification and inventory management.
