## Description

The 2-liter Self-Compensating Drip Irrigation System is an advanced solution for the efficient irrigation of crops and gardens. This irrigation system is designed to provide uniform water distribution, ensuring that each plant receives the right amount of moisture, resulting in healthy and productive growth. Its self-compensating design allows the drip rate to remain constant, regardless of variations in water pressure, making it an ideal choice for a variety of irrigation installations. Presented in a pack of 200 units, this product is perfect for large-scale projects or for those looking to optimize their home irrigation system.

- **Capacity:** 2 liters per hour
- **Type:** Self-compensating drip irrigation
- **Presentation:** Pack of 200 units
- **Distribution:** Uniform and efficient
- **Compatibility:** Various irrigation systems
- **Material:** Durable and resistant
- **Installation:** Quick and easy
- **Use:** Ideal for crops and gardens
- **Waste reduction:** Optimizes water use
- **Pressure range:** Works at different water pressures
