Description

The self-compensating dripper is an efficient solution for watering plants in gardens and orchards. Designed to provide a constant and precise supply of water, this device ensures that each plant receives the right amount of hydration, regardless of variations in water pressure.

- Flow rate: Available in 4L/h or 8L/h options, adapting to the specific needs of each plant.
- High-quality membrane: The internal membrane guarantees regular dripping, maintaining consistency in the water supply.
- Self-compensating: Capable of delivering exact amounts of water over a wide range of pressures, ensuring uniform irrigation.
- Easy installation: Its design allows for quick and easy installation, optimizing the time and effort spent setting up your irrigation system.
- EAN13: 8432453035704
