Description

The 3mm 3/4" fertilizer injector is an essential tool for efficient nutrient management in irrigation systems. Designed for accuracy and durability, this device ensures even fertilizer distribution, optimizing plant growth and improving agricultural productivity. Its robust construction and high-quality components ensure reliable performance in various working conditions.

- **Body Material:** Made of polypropylene, providing chemical resistance and durability.
- **Available Diameters:** Four diameter options to suit different installation needs.
- **Flow Meter:** Precise and reliable graduation, with a stainless steel indicator ball to prevent rust.
- **Dosing Wrench:** Allows you to adjust the fertilizer dose and acts as a non-return valve when closed.
- **Check Valve:** Prevents fluid from returning to the tank and includes a filter to prevent blockages due to suspended sediments.
