Description

The 7mm 1" Fertilizer Injector is an essential tool for efficient nutrient management in irrigation systems. Designed for accuracy and durability, this device makes it easy to incorporate liquid fertilizers into the water flow, ensuring even and controlled distribution. Its robust construction and high-quality materials ensure reliable performance under various operating conditions.

- **Body Material:** Made of polypropylene, providing chemical resistance and durability.
- **Available Diameters:** Four diameter options to suit different installation needs.
- **Flow Meter:** Equipped with a stainless steel indicator ball, it offers precise and reliable graduation, avoiding rust problems.
- **Dosing Wrench:** Allows you to adjust the fertilizer dose precisely. It also works as a non-return valve when closed.
- **Check Valve:** Prevents fluid backflow to the tank. It includes a filter to prevent blockages due to suspended sediment.
