

Product sheet

Reduced threaded nipple - 2" - 1 1/2", ABRISA.

Brand: ABRISA

Reference: GIB 001323

Polypropylene threaded connection that allows for the integration of components into irrigation systems. Its compact design facilitates adaptation to drip irrigation and water conveyance applications, ensuring an efficient and secure connection in various diameter configurations.

Description

The reduced threaded nipple is an essential component in the installation of irrigation systems, specifically designed to facilitate the connection of different pipe diameters. This fitting is especially useful in drip irrigation systems and water conduction for irrigation, providing an efficient and safe solution for water management in various agricultural and gardening applications.

- Material: Polypropylene (PP), known for its strength and durability under long-term use.
- Connection diameter: 2" to 1 1/2", allowing adaptation between different pipe sizes.
- Compatibility: Suitable for drip irrigation systems and water conduction, ensuring a secure and leak-free connection.
- Available diameter range: From Ø3/4x1/2" to Ø3x2-1/2", offering versatility for various irrigation system configurations.
- EAN13 code: 8432453013238, for easy identification and inventory management.
