Description

The reduced threaded connector is an essential component for the installation of irrigation systems, specifically designed to facilitate the connection of different elements in drip irrigation and water conduction systems. Made of high-quality materials, this fitting ensures a secure and long-lasting connection, optimizing the performance of your irrigation system.

- Material: Polypropylene (PP), known for its strength and durability in irrigation applications.
- Connection diameter: M1 1/4" - H1", suitable for various irrigation system configurations.
- Compatibility: Designed to easily integrate into drip irrigation systems and other water conveying applications.
- Available diameter range: From Ø3/4x1/2" to Ø3x2-1/2", offering versatility for different installation needs.
- EAN13 code: 8432453013214, for easy identification and inventory management.
