Labyrinth Pickaxe Bag 50 Units - 4.5x6.5mm, ABRISA

Brand: ABRISA

Reference: GIB 006729

An essential element for irrigation systems, made of polypropylene, which ensures efficient water distribution in hydroponic crops and nurseries. Its design allows connection to 6.5-4.5 mm microtubes, optimizing irrigation in pots and improving water use in each application.

Description

The labyrinth spike is an essential component for efficient irrigation systems, specifically designed for use in hydroponic crops, nurseries, and multiple-water container irrigation. Its design allows for even water distribution, ensuring each plant receives the proper amount of hydration. Made of polypropylene, this stake is strong and durable, ideal for withstanding the demanding conditions of growing environments.

- Connection: Compatible with 6.5mm to 4.5mm microtubes, making it easy to integrate into existing irrigation systems.
- Material: Polypropylene, known for its corrosion resistance and durability in outdoor conditions.
- Functionality: The labyrinth design allows water to flow through the microtube and distribute it evenly, optimizing the irrigation of each plant.
- Applications: Widely used in hydrological crops, nurseries and multiple irrigation systems for pots, adapting to various irrigation needs.
- EAN13: 8432453067293, for easy identification and management in inventories.
