Polyethylene microtube roll - 100m - 4x6mm

Brand: GIBALTO

Reference: GIB 003373

100-meter polyethylene microtube, designed for irrigation systems and agricultural applications. Its structure allows for efficient water channeling, ensuring durability and precise installation that minimizes waste, contributing to sustainability and prolonging the effectiveness of the irrigation system.

Description

Polyethylene microtubing roll is an efficient solution for irrigation systems, specifically designed to optimize water channeling in agricultural applications. This product is characterized by its durability and ability to maintain the integrity of the irrigation system, ensuring a constant and leak-free flow.

- Material: Polyethylene, known for its strength and flexibility, ideal for withstanding adverse environmental conditions.
- Dimensions: 4x6 mm, providing a balance between flow capacity and ease of installation.
- Length: 100 meters, enough to cover large areas of crops or gardens.
- Design: Structure that allows a secure and leak-free connection, optimizing water use.
- Availability: Offered in four different sizes to adapt to various installation needs.
- EAN13: 8432453033731, for easy identification and inventory management.
