Description

Polyethylene microtubing roll is an efficient solution for irrigation systems, specifically designed to optimize water channeling in agricultural applications. This product stands out for its durability and ability to maintain the integrity of the irrigation system, ensuring efficient water use.

- Material: Polyethylene, known for its strength and flexibility.
- Dimensions: 4x6 mm, suitable for various irrigation configurations.
- Length: 200 meters, providing sufficient reach for large crop areas.
- EAN13: 8432453033762, for easy identification and inventory management.
- Optimized design to minimize water loss and maximize system efficiency.
- Available in four different sizes to adapt to various installation needs.
- Bulk sales, facilitating the acquisition in large quantities for larger projects.
