Polyethylene microtube roll - 25m - 4x6mm

Brand: GIBALTO

Reference: GIB 003374

25-meter polyethylene micropipe, designed for irrigation systems and agricultural applications. Its structure allows for efficient water channeling, contributing to the system's durability. Manufactured with high-quality materials, it offers reliable installation and prolongs the life of irrigation equipment.

Description

The polyethylene microtube roll is an efficient solution for irrigation systems, specifically designed to facilitate the channeling of water in agricultural applications. Its robust structure and high-quality material ensure optimal and long-lasting performance, contributing to the efficiency of the irrigation system by minimizing water loss.

- Material: Polyethylene, known for its strength and durability in outdoor conditions.
- Dimensions: 25 meters in length with a diameter of 4x6 mm, suitable for various irrigation configurations.
- Design: Structure that allows a perfect union, avoiding water waste.
- Versatility: Available in four different sizes to adapt to different installation needs.
- EAN13: 8432453033748, for easy identification and inventory management.
