Description

The polyethylene microtube roll is an efficient solution for irrigation systems, specifically designed to facilitate the channeling of water in agricultural applications. This product is essential for those looking to optimize the use of water in their irrigation facilities, guaranteeing uniform distribution without waste.

- Material: Polyethylene, known for its durability and resistance to adverse environmental conditions.
- Dimensions: 50 meters long with a diameter of 4x6 mm, suitable for various irrigation configurations.
- Design: Structure that ensures a hermetic connection, minimizing water loss.
- Versatility: Available in four different sizes to adapt to different installation needs.
- EAN13: 8432453033755, for easy identification and reference in inventories.
