Reduced Tee Fitting - 25 - 20mm, ABRISA

Brand: ABRISA

Reference: GIB 001231

Accessory designed for polyethylene pipes, facilitating their connection and routing. Its polypropylene and rubber construction guarantees optimal sealing, while the conical acetic resin sleeve ensures a precise fit. Ideal for applications requiring reliability and durability in the piping system.

Description

The REDUCED TE FITTING is an efficient solution for polyethylene piping systems, designed to facilitate their continuity, connection, and derivation. This component is essential in installations that require a safe and reliable transition between different pipe diameters.

- Body and nut made of polypropylene (PP), providing durability and corrosion resistance.
- Rubber O-ring, which guarantees optimal tightness, preventing leaks and ensuring efficient system performance.
- Polypropylene gland seal, which offers a secure and stable fit, maintaining the integrity of the connection.
- Conical acetic resin bushing, designed to facilitate assembly and ensure a firm and long-lasting connection.
- Available in diameters ranging from Ø25-20mm to Ø63-50mm, adapting to various installation needs.
