Description

The 150-hour power reserve time switch is designed to efficiently manage the switching on and off of electrical systems. This staircase time switch is suitable for DIN rail installation, offering a practical solution for time control in various electrical applications.

- Manual switch with two positions: automatic on and permanent on.
- Resettable function allows the timing to be adjusted at any time.
- Adjustable timing interval from 30 seconds to 10 minutes.
- 150-hour power reserve to maintain programming in the event of a power outage.
- Compatible with DIN rail installation, facilitating integration into electrical panels.
