KRANG Test Lead Kit

Brand: KRANG

Reference: GIB 004186

Universal test lead set, ideal for multimeters, allowing for precise measurements in electrical and electronic applications. Its construction with high-quality materials ensures durability and optimal performance, adapting to a variety of working conditions and being compatible with multiple measuring devices.

Description

The test lead kit is an essential tool for those who work with multimeters, offering versatility and accuracy with every measurement. Designed to suit a wide range of applications, this universal lead set ensures reliable and long-lasting performance in both professional and educational settings. Its ergonomic design and high-quality materials ensure comfortable and safe use, allowing users to perform electrical tests with confidence.

- **Probe Type:** Universal, compatible with most multimeters available on the market.
- **Probe Material:** Made of highly conductive metals to ensure accurate and consistent measurements.
- **Cable Length:** Designed to offer flexibility and adequate reach during testing.
- **Insulation:** Heat-resistant and wear-resistant silicone coating, providing additional security during use.
- **Connectors:** Standard terminals that ensure a secure and stable connection with the multimeter.
- **Temperature Range:** Operating in a wide temperature range, suitable for various working conditions.
- **Voltage Resistance:** Capable of withstanding high voltages, ensuring equipment integrity and user safety.
- **Compatibility:** Compatible with a variety of multimeter brands and models, facilitating integration into different work environments.
