Description

The flexible head polyamide cable gland is a tool designed to facilitate the passage of cables through pipes and conduits. Its polyamide construction and ergonomic design ensure efficient and long-lasting use, adapting to the needs of electrical and telecommunications installations.

- Material: High-strength polyamide, providing flexibility and durability.
- Guide diameter: 3 mm, suitable for a wide variety of applications.
- Flexible head: 20 meters long, allowing easy handling in tight spaces.
- Spring-loaded end with rounded head: Facilitates penetration into the pipe, minimizing the risk of jamming.
- Clamping washer: On the opposite end, to secure the cable during the installation process.
- Brass terminals: Made of maximum hardness material, guaranteeing a secure and resistant connection.
- Total length of the cable gland: 20 meters, providing a suitable reach for most installations.
