Description

The mechanical timer clock for indoor use is an efficient and practical tool designed to manage the switching on and off of electrical devices automatically. Its compact and functional design allows easy integration into any home or office environment, offering a reliable solution for energy control.

- **24-hour programming:** Allows you to set on and off cycles throughout the day, adapting to the specific needs of each user.
- **Minimum switching time of 15 minutes:** Offers flexibility in programming, allowing precise adjustments to optimize energy usage.
- **IP20 rating:** Designed for indoor use, providing protection against contact with solid objects larger than 12 mm in diameter.
- **Maximum capacity of 3500W:** Supports a wide range of electrical devices, ensuring efficient and safe performance.
- **White color:** Its neutral finish easily adapts to any decoration, maintaining the aesthetics of the space.
