

Product sheet

Air conditioning drain pipe union 10 units, GENIL.

Brand: GENIL

Reference: GIB 012433

Connector designed for joining drain pipes in air conditioning systems, ensuring efficient and safe installation. Its 14 mm diameter allows for precise fitting, facilitating proper drainage of condensation generated in the unit. Ideal for HVAC applications.

Description

The condensate drain pipe fitting is an essential component in air conditioning installations, designed to ensure an efficient and secure connection between pipe sections. This product is made from high-quality materials that guarantee durability and resistance to environmental conditions, ensuring optimal performance in condensate handling.

- Diameter: Ø14 mm, suitable for most standard air conditioning installations.
- Material: Made from corrosion-resistant plastic, ensuring a long life and minimal maintenance.
- Compatibility: Designed to be compatible with a wide range of air conditioning systems, facilitating its integration into new or existing installations.
- Ease of installation: Its design allows for quick and easy connection, reducing installation time and minimizing the risk of leaks.
- Temperature resistance: Able to withstand temperature variations typical in air conditioning systems, while maintaining their structural integrity.
- Quantity: The package includes 10 units, providing enough material for multiple connections or installation projects.
