Description

10mm tile spacers are an efficient solution for ensuring an even and accurate finish when installing tiles. Designed for strength and durability, these spacers are suitable for construction and renovation projects that require accurate tile spacing.

- Size: 10mm, ideal for maintaining even spacing between tiles.
- Material: Made from high-quality materials that ensure resistance to deformation during the installation process.
- Presentation: Available in bags of 1,000 units, making handling and storage easier on large-scale projects.
- EAN13: 8425685294728, for easy identification and inventory management.
- Design: The spacers are designed to be easily removable once the adhesive has set, without compromising the integrity of the work carried out.
