Description

The MAXX flat-end screwdriver is designed for high-demand users who demand reliable and fault-free tools. Its ergonomic handle allows to apply a high axial force to the screw without excessive effort, generating great contact pressure and avoiding sliding out of the head.

Technical characteristics

- Triangular shape tested with ideal tightening angle of 120o.
- Soft material turning zone for faster and more satisfying.
- Rods of special steel hardened and tempered.
- Matt chromed with permanent marks.
- Black tips that guarantee high accuracy and correct adjustment.
- Available in size PL 3.5x75.

The combination of its geometric design and resistant materials ensures maximum torque and precise handling in general mechanical work.
