WITTE BITFLEX TIN Phillips tip guide 1/4" short PH1x25 mm

Brand: Witte

Reference: TUR 28421

BITFLEX TIN Phillips bit with 1/4" short guide (PH1x25) and titanium nitride coating, offering high hardness and wear resistance. Ideal for serial and automated screwdriving, it combines flexibility and durability in its design.

Description

The Witte BITFLEX TIN 1/4" Short Guide Phillips bit (PH1x25) is a high-precision tool designed to meet the demands of serial and automated screwdriving. Its titanium nitride (TIN) coating provides a Wickers hardness of approximately 2800 HV, which is three times the hardness of a standard extra-hard bit. This feature ensures superior resistance to wear and abrasion, extending tool life and minimizing the risk of premature breakage.

BITFLEX TIN bits are the perfect combination of flexibility and durability, making them an ideal choice for industrial and high-demand applications. Their short design allows easier access in confined spaces, ensuring optimal performance every time.

- **Material:** Titanium nitride (TIN)
- **Hardness:** 2800 HV (Wickers)
- **Type of Tip: Phillips (PH1)**
- **Length: 25 mm**
- **Guide: 1/4"**
- **Flexibility: High, thanks to BITFLEX technology**
- **Recommended use: Serial and automated screwdriving**
- **Wear resistance: Superior, thanks to the TIN coating**
- **Applications: Industrial and high-demand**
- **Access: Short design for confined spaces**

Specifications

EAN	4003955308241
Manufacturer	WITTE
Weight (kg)	0,0100
