Description

The BITPRO Witte-26431 flat bit is a tool designed to deliver exceptional performance in applications requiring high torque, such as driving metric screws into metal. Its titanium nitride (TIN) coating provides a Wickers hardness of approximately 2800 HV, which is three times the hardness of a conventional extra-hard bit. This feature ensures greater durability and wear resistance, minimizing the risk of breakage due to abrasion during use. The short 1/4" guide allows for easy adaptation to various tools, making this bit a versatile option for professionals and DIY enthusiasts.

- **Model:** Witte-26431
- **Type:** Standard Tin Flat Point
- **Size:** 4.5 x 25 mm
- **Coating:** Titanium Nitride (TIN)
- **Hardness:** 2800 HV (Wickers)
- **Durability:** High resistance to wear and abrasion
- **Applications:** Metric screws in metal
- **Guide:** Short 1/4"
- **Use:** Ideal for jobs requiring high torque
- **Compatibility:** Standard screwdriving tools

Specifications

EAN	4003955310541
Manufacturer	WITTE
Weight (kg)	0,0100
