Description

The NWS universal key is an essential tool designed for the maintenance of locks in new construction buildings, ensuring fast and secure access to technical cabinets and distribution systems.

Technical characteristics

- Made of zinc casting (GD-Zn) for maximum durability.
- 1/4" tips made of high quality steel specially tempered.
- It includes plastic adapter with 1/4" pencil holder and a 20 cm retention chain.
- Inserts with double function for greater versatility.
- Identification of the drive marked at each tip.
- Compatible with most usual closing systems.

Its versatility allows its use in heating, sanitary, air conditioning and ventilation facilities, as well as in industry and construction technology. It is ideal for doors and windows in new construction, purge of heating systems and other technical applications where handling of standard locks is required.
