Description

The NWS universal key is an essential tool designed for access to electrical cabinets, distribution panels and technical locking systems. Its versatility makes it an indispensable component for professionals working in electrical engineering, air conditioning, heating and ventilation.

Technical characteristics

- Made of zinc casting (GD-Zn) to ensure robustness.
- 1/4" tips made of high quality steel specially tempered.
- It includes plastic adapter with 1/4" pencil holder and a 20 cm retention chain.
- Identification of clearly marked drive at each tip.
- Inserts with double function for greater operativity.
- Compatible with most electric cabinets and usual closures.

This tool facilitates the maintenance and purging of heating systems, as well as the management of technical installations in various industrial and construction environments. Its design allows safe and efficient handling of control frames.
