Product sheet

KUKKO Universal 2-Legged Bearing Puller, 120mm Depth, Adjustable Hooks.

Brand: Kukko

Reference: TUR 20-10-P3

2-legged universal multi-bearing puller with variable clamping depth. Suitable for both external and internal use. Ideal for asymmetrical machined parts. Includes a grease tube for lubrication. Robust design and easy handling.

Description

The **Kukko-20-10-P3** is a 2-leg, multi-purpose universal bearing puller designed to offer a versatile and efficient solution for removing machined parts. With variable clamping depth, thanks to its pull hooks of varying lengths, this puller adapts to different applications, allowing for both external and internal pulls by rotating the hooks. Its original KUKKO design has proven to be robust and reliable worldwide, guaranteeing high performance with every use.

The puller legs remain constantly parallel in every position, ensuring that only the support surfaces come into contact with the part being pulled, minimizing the risk of damage. Furthermore, the spindle head depth stop prevents the wrench from slipping, providing greater safety during operation.

The crossbar, which supports up to a size of -30, features a hexagonal head that improves grip.

- Universal puller with multiple legs.
- Original KUKKO design, proven robustness and reliability.
- Parallel legs in every position for secure contact.
- Robust finish and high performance.
- Universal application with interchangeable legs.
- Use as an external and internal puller.
- Includes a tube of special Kukko grease for spindle lubrication.
- Maximum stability in the sliding part of the leg.
- Easy movement and secure mounting thanks to the optimized geometry of the guide rails.

Specifications

High	5,00
Width	24,50
EAN	4021176267611
Manufacturer	Kukko
Weight (kg)	3,4000
Depth	32,50
