## KUKKO Universal 2-Legged Bearing Puller 200 x 150/300 mm with Adjustable Hooks

Brand: Kukko

Reference: TUR 20-20-P2

The Kukko-20-20-P2 bearing puller features adjustable extraction hooks and is suitable for asymmetrical parts. Its robust and functional design allows for use as an internal and external puller, ensuring stability and easy handling in various applications.

### Description

The **Kukko-20-20-P2** is a 2-leg, multi-purpose universal bearing puller designed to offer a versatile and efficient solution for removing machined parts. Measuring 200 x 150/300 mm, this puller stands out for its variable clamping depth, thanks to the extraction hooks that adapt to different lengths. Its innovative design allows it to be used as both an external and internal puller simply by rotating the extraction hooks, making it an ideal tool for asymmetrical parts.

The robustness and reliability of KUKKO's original design have been proven over the years, guaranteeing superior performance in a variety of applications. The puller's legs remain constantly parallel in every position, ensuring that only the support surfaces come into contact with the part being extracted, minimizing the risk of damage.

Furthermore, the depth stop on the spindle head prevents the wrench from slipping, providing greater safety during use.

- Universal puller with multiple legs.
- Original KUKKO design, robust and reliable.
- Parallel legs in every position.
- Robust finish and high performance.
- Universal application with interchangeable legs.
- Use as an external and internal puller.
- Includes a tube of special Kukko grease.
- Maximum stability in the sliding part of the leg.
- Easy movement and secure leg attachment.

- New optimized guide rail geometry.

Specifications

|              |               |
|--------------|---------------|
| High         | 6,00          |
| Width        | 26,50         |
| EAN          | 4021176003004 |
| Manufacturer | Kukko         |
| Weight (kg)  | 5,9000        |
| Depth        | 38,50         |
