Description

The **Kukko-20-1+** is a 2-legged universal bearing puller designed to offer an efficient and versatile solution for removing machined parts. Its innovative hand-adjustable knurled knob allows the puller hook to be quickly released and slid along the crossbar, eliminating the need for additional tools. This puller is ideal for both external and internal pulling applications, thanks to the ability to rotate the puller hooks. It is also suitable for asymmetrical machined parts, expanding its range of use.

The Kukko-20-1+'s structure ensures optimal stability, as the legs remain parallel in every position, ensuring that only the support surfaces come into contact with the part being pulled. Its robust construction and high performance make it an easily manageable tool, suitable for various depths thanks to its interchangeable legs.

Includes a special Kukko grease tube, which keeps the spindle properly lubricated, ensuring smooth and prolonged operation.

- Universal 2-Leg Puller
- Manual Adjustment Knurlings for Quick Adjustment
- Parallel Legs in Every Position
- Use as an External and Internal Puller
- Suitable for Asymmetrical Machined Parts
- Depth Stop to Prevent Slippage
- Robust Construction and High Performance
- Interchangeable Legs for Various Depths
- Optimized Geometry for Easy Movement

- Includes Special Kukko Grease Tube

Specifications

High	4,10
Width	13,20
EAN	4021176644771
Manufacturer	Kukko
Weight (kg)	1,1000
Depth	18,00
