Description

The **Kukko-20-10+** is a 2-legged universal bearing puller designed to offer an efficient and versatile solution for removing machined parts. Its innovative manual adjustment knurl allows the puller hook to be quickly released and slid along the crossbar, eliminating the need for additional tools. This puller is ideal for both external and internal pulling applications, thanks to the ability to rotate the puller hooks. It is also suitable for working with asymmetrical machined parts, making it an indispensable tool in any workshop.

The Kukko-20-10+'s structure ensures optimal stability, as the legs remain parallel in every position, ensuring that only the support surfaces come into contact with the part being pulled. Its robust construction and high-performance design make it easy to handle, while the interchangeable legs allow it to adapt to various pulling depths.

Includes a special Kukko grease tube to keep the spindle properly lubricated, ensuring smooth and long-lasting operation.

- Universal 2-Leg Puller
- Manual Adjustment Knurlings for Quick Adjustment
- Parallel Legs for Minimal Workpiece Contact
- Use as an External and Internal Puller
- Suitable for Asymmetrical Machined Parts
- Depth Stop to Prevent Slippage
- Robust Construction and High Performance
- Interchangeable Legs for Various Depths

- Optimized Geometry for Easy Movement
- Includes Grease Tube for Lubrication

Specifications

High	4,10
Width	16,50
EAN	4021176644856
Manufacturer	Kukko
Weight (kg)	1,3000
Depth	18,00
