Description

The **Kukko-20-30+** is a 2-leg universal bearing puller designed to deliver exceptional performance and unparalleled ease of use. Thanks to its hand-adjustable knurled knob, the puller hook can be quickly released and slid onto the crossbar without the need for additional tools. This puller is versatile, allowing its reach to be increased with optional extensions available up to size -20. Its design allows it to be used for both external and internal pulls simply by rotating the puller hooks, making it suitable even for asymmetrical machined parts.

The Kukko-20-30+'s robust construction ensures high performance and easy handling. The legs remain constantly parallel in every position, ensuring that only the bearing surfaces come into contact with the part being pulled. Furthermore, the spindle head depth stop prevents the wrench from slipping, providing greater stability during use.

This puller includes a special Kukko grease tube to keep the spindle properly lubricated, extending its lifespan and improving its performance.

- Universal 2-Leg Puller
- Manual Adjustment Knurlings for Quick Adjustment
- Interchangeable Legs for Various Depths
- Use as an External and Internal Puller
- Robust Design and High Performance
- Guaranteed Stability on the Sliding Leg Section
- Easy Movement and Secure Fixing
- Compatible with Asymmetrical Machined Parts

- Includes Special Kukko Grease Tube

Specifications

High	8,00
Width	10,00
EAN	4021176645273
Manufacturer	Kukko
Weight (kg)	8,0000
Depth	45,00
