KUKKO 2-Legged Bearing Puller for Tight Spaces 200x150 mm

Brand: Kukko

Reference: TUR 20-20+S

The Kukko-20-20+S is a universal, two-legged bearing puller, ideal for tight spaces. Its manual adjustment knurled knob allows for quick sliding of the hooks, facilitating the removal of asymmetrical machined parts and components in hard-to-reach places.

Description

The **Kukko-20-20+S** is a 2-legged universal bearing puller specifically designed for use in confined spaces. Its compact design and slim puller claws allow access to hard-to-reach places, facilitating the removal of components such as bearings, pinions, and gear wheels. This puller is distinguished by its hand-adjustable knurled knob, which allows for quick release and sliding of the puller hooks on the crossbar without the need for additional tools.

The versatility of the Kukko-20-20+S is further enhanced by its ability to be used as both an external and internal puller, simply by rotating the puller hooks. Optional extensions are also available to increase reach, up to size -20.

The puller's structure ensures maximum stability in the sliding part of the legs, resulting in safe and efficient operation.

- Universal 2-leg puller with narrow claws for tight spaces.
- Manual adjustment knobs for quick, tool-free adjustment.
- Capable of removing bearings, pinions, and gear wheels.
- Usable as an external and internal puller.
- Includes a tube of special Kukko grease for lubricating the spindle.
- Optimized design for easy movement and leg attachment.
- Maximum stability in the sliding part of the legs.
- Optional extensions available up to size -20.
- Ideal for asymmetrical machined parts.

Specifications

High	4,70
Width	25,00
EAN	4021176756559
Manufacturer	Kukko
Weight (kg)	3,1000
Depth	25,00
