Description

The **Kukko-20-1-S** is a universal, two-legged bearing puller specifically designed for use in confined spaces. Measuring **90x100 mm**, this puller is ideal for working in hard-to-reach areas, where the slim extraction hooks allow for efficient and precise operation. Its versatility is further enhanced by the availability of optional extensions, up to size -20, which expand its reach and functionality.

This puller can be used for both external and internal extraction simply by rotating the extraction hooks. It is also suitable for removing asymmetrical machined parts, making it an indispensable tool in any workshop.

The design includes a depth stop on the spindle head, which prevents the wrench from slipping during use, thus ensuring greater safety and efficiency.

- Universal 2-leg puller with narrow claws.
- Ideal for removing bearings, pinions, and gear wheels.
- Slim extraction hooks for confined spaces.
- Optional extensions available down to size -20.
- Usable as an external and internal puller.
- Suitable for asymmetrical machined parts.
- Depth stop on the spindle head.
- Includes a tube of special Kukko grease for spindle lubrication.
- Maximum stability in the sliding part of the leg.
- Optimized guide rail geometry for easy movement and locking.

Specifications

High	4,10
Width	13,20
EAN	4021176757396
Manufacturer	Kukko
Weight (kg)	1,0000
Depth	18,00
