Description

The **Kukko-20-10-SP** is a 2-legged universal bearing puller specifically designed for use in confined spaces. Its compact design and slim puller hooks allow access to hard-to-reach places, facilitating the precise and efficient removal of mechanical components. This puller is versatile, as it can be used as both an external and internal puller simply by rotating the puller hooks. Furthermore, it is suitable for removing asymmetrical machined parts, making it an indispensable tool for professionals and DIY enthusiasts alike.

The spindle head depth stop prevents the wrench from slipping, ensuring safe and efficient use. The Kukko-20-10-SP is supplied with three pairs of legs of different lengths, allowing it to adapt to various extraction depths.

This puller is ideal for removing bearings, pinions, and gear wheels, among other components.

- Universal 2-leg puller with narrow claws.
- Designed for tight spaces.
- Includes three pairs of legs of different lengths.
- Usable as an external and internal puller.
- Suitable for asymmetrical machined parts.
- Depth stop on the spindle head.
- Includes a tube of Kukko special grease for lubrication.
- Maximum stability in the sliding part of the leg.
- Easy movement and secure leg attachment.
- Optimized guide rail geometry.

Specifications

High	23,30
Width	4,10
EAN	4021176461514
Manufacturer	Kukko
Weight (kg)	3,4000
Depth	17,90
