Description

The **Kukko-30-30+** is a 3-legged universal bearing puller designed to deliver exceptional performance in a variety of applications. Its innovative hand-adjustable knurled knob allows the puller hook to be quickly released and slid onto the crossbar, eliminating the need for additional tools. This versatile puller can be used for both external and internal extraction simply by rotating the puller hooks. It is also suitable for asymmetrical machined parts, making it an indispensable tool in any workshop.

The Kukko-30-30+'s structure ensures concentric extraction and a secure grip, thanks to its legs that remain parallel in every position, ensuring that only the support surfaces come into contact with the part being extracted. Its robust finish and high-quality design make it easy to handle, while the interchangeable legs allow for adaptation to different extraction depths.

Includes a special Kukko grease tube to keep the spindle properly lubricated, ensuring optimal operation.

- Universal 3-leg puller.
- Manual adjustment knobs for quick adjustment.
- Usable as an external and internal puller.
- Suitable for asymmetrical machined parts.
- Depth stop on the spindle head.
- Constantly parallel legs for optimal contact.
- Uniform force distribution for concentric extraction.
- Easy leg movement and locking.
- Robust construction and high performance.

- Includes grease tube for spindle lubrication.

Specifications

High	39,00
Width	36,50
EAN	4021176303333
Manufacturer	Kukko
Weight (kg)	10,6300
Depth	7,50
