

Product sheet

KUKKO 21x220 mm mechanical spindle with depth stop and reversible tip.

Brand: Kukko

Reference: TUR 621220

KUKKO-621220 mechanical spindle for bearing pullers, measuring 21 x 220 mm. Equipped with a depth stop, laser markings, and a special coating for optimal sliding. Reversible tip for better shaft adaptation. Ideal for KUKKO pullers.

Description

The Kukko-621220 mechanical spindle is an essential tool for bearing extraction, specifically designed for use with KUKKO extractors. Measuring 21 x 220 mm, this spindle is distinguished by its robustness and precision, guaranteeing optimal performance in industrial and maintenance applications.

One of the most notable features of this spindle is its head, which incorporates a depth stop. This innovative design prevents the wrench from slipping during the extraction process, providing greater safety and efficiency. Furthermore, both the head and neck of the spindle are marked with the part number using a laser engraving process, ensuring clear and lasting identification.

The spindle has a special coating that improves its sliding ability, facilitating its use in various conditions.

The spindle tip is reversible, allowing for optimal adaptation to the shaft and increasing the tool's versatility.

- Dimensions: 21x220 mm
- Depth stop on the head
- Laser marking on head and neck
- Special coating for improved sliding
- Reversible tip for shaft adaptation
- Designed for KUKKO pullers
- High strength and durability
- Ideal for industrial applications

- Facilitates the bearing removal process
- Compatible with various shaft configurations

Specifications

Colour	Black
EAN	4021176268373
Manufacturer	Kukko
Weight (kg)	0,5800
