**KUKKO 21x300 mm mechanical spindle with depth stop and reversible tip.**

Brand: Kukko

Reference: TUR 621300

KUKKO-621300 21x300 mm mechanical spindle, designed for bearing pullers. Equipped with a depth stop and laser markings on the head and neck. Its special coating ensures optimal sliding. Reversible tip for better shaft adaptation.

[View product online](#)**Description**

The **Kukko-621300-Mechanical Spindle for Bearing Pullers** is a tool specifically designed to optimize the bearing extraction process when used with KUKKO pullers. Measuring 21 x 300 mm, this mechanical spindle is distinguished by its robustness and precision, ensuring efficient performance in various industrial and maintenance applications.

One of the most notable features of this spindle is its head, which incorporates a depth stop. This design prevents the wrench from slipping during the extraction process, providing greater safety and control for the user. Furthermore, both the head and neck of the spindle are laser-marked with the part number, facilitating identification and ensuring product authenticity.

The spindle's special coating ensures exceptional sliding capability, enabling smooth and efficient operation.

The spindle tip is reversible, ensuring optimal adaptation to the shaft and increasing the tool's versatility.

- Dimensions: 21x300 mm
- Depth stop on the spindle head
- Laser-marked part number
- Special coating for optimal sliding
- Designed for exclusive use with KUKKO pullers
- Reversible tip for better adaptation
- High-quality manufacturing

- Ideal for industrial applications
- Facilitates the bearing removal process
- Guaranteed robustness and precision

Specifications

High	32,40
Width	2,60
Colour	Black
EAN	4021176765346
Manufacturer	Kukko
Weight (kg)	0,2000
Depth	2,60
