Description

The Kukko-12-1 is a 3-legged bearing puller with a preset reach, designed to provide an efficient and safe solution for removing mechanical components such as bearings, sprockets, and belt pulleys. This puller is notable for its robust construction and gripping ability, which resembles the bite of an alligator, ensuring that the extraction hooks remain firmly attached to the workpiece without risk of loosening. The adjustment wrench allows you to modify the necessary reach, ensuring a firm grip and preventing any movement of the nails during the extraction process.

- 3-leg design for optimal grip.
- Pre-adjustable reach to suit different part sizes.
- Extraction hooks that adjust and secure with the adjustment wrench.
- Depth stop on the spindle heads to prevent slippage.
- Interchangeable components, identifiable by the number engraved on each part.
- Ideal for removing bearings, gears, and belt pulleys.
- Robust construction for long durability.
- Excellent grip that prevents unwanted movement of the nails.
- Easy to use, even in confined spaces.
- An essential tool for professionals and hobbyists in mechanical maintenance.

Specifications

High	10,50
Width	10,50
EAN	4021176006616
Manufacturer	Kukko
Weight (kg)	1,2000

Depth	22,30
