Description

The Kukko-12-3 is a 3-legged bearing puller with a preset reach, designed to provide an efficient and safe solution for removing mechanical components such as bearings, sprockets, and belt pulleys. Its innovative hook system allows for a firm and secure grip, similar to an alligator's bite, ensuring that the part being removed does not come loose during the process. The adjustment wrench allows you to pre-configure the required reach, ensuring the puller's claws stay in place without unwanted movement.

- **Dimensions:** 200x180 mm
- **Type:** 3-Leg Puller
- **Grip:** Hooks that adjust with a wrench
- **Safety:** Depth stop on spindle heads to prevent slippage
- **Compatibility:** All components available as replacement parts
- **Applications:** Ideal for removing bearings, sprockets, and belt pulleys
- **Construction:** Robust design for high power and durability
- **Ease of Use:** Quick and easy reach adjustment
- **Stability:** The nails will not give way or shift during operation
- **Identification:** Number engraved on the part for easy reference of spare parts

Specifications

High	15,00
Width	15,00
EAN	4021176006876
Manufacturer	Kukko
Weight (kg)	3,4000
Depth	29,00
