Description

The **Kukko-44-2** is a 2-leg, self-centering bearing puller designed to deliver exceptional performance when removing tightly clamped parts. Its innovative automatic self-centering system for the puller hooks ensures a precise and secure fit, while the spindle head depth stop prevents the wrench from slipping during use. This puller is ideal for applications requiring fast and effective clamping, such as removing gears, sprockets, bearings, and pulleys.

Made with forged special steel legs, the Kukko-44-2 combines robustness and durability, ensuring a long service life even under demanding working conditions.

By tightening the spindle, the extractor's legs grip the workpiece, generating an automatically increasing force that facilitates the extraction process without damaging the parts.

- Original KUKKO design
- Automatic grip adjustment
- Quick and self-locking clamping
- Depth stop on the spindle head
- Legs made of forged special steel
- Robust model for firmly clamped workpieces
- Ideal for gears, pinions, bearings, and pulleys
- Replaceable components with engraved numbers
- Dimensions: 120x120 mm
- Automatic grip, locking, and leg centering

Specifications

High	3,60
Width	12,00
EAN	4021176016103
Manufacturer	Kukko
Weight (kg)	0,8000
Depth	20,00
