Description

The **Kukko-45-1** is a 3-legged, self-centering bearing puller designed to deliver exceptional performance when removing tightly clamped parts. This model, measuring **100x100 mm**, features an innovative automatic grip adjustment system that allows for quick and secure clamping. When the spindle is tightened, the puller's legs automatically adjust to the part being removed, generating progressively increasing force and ensuring efficient and trouble-free extraction.

Made from specially forged steel, the Kukko-45-1 ensures exceptional robustness and durability, making it the ideal tool for demanding jobs. Its design includes a depth stop on the spindle head, which prevents the wrench from slipping during use, providing greater safety and precision in every operation. Furthermore, all components of the puller can be supplied as replacement parts, thanks to the number engraved on each piece, which facilitates maintenance and extends its service life.

- 3-Leg Self-Centering Puller
- Dimensions: 100x100 mm
- Automatic Grip Adjustment
- Quick and Self-Locking Clamping
- Made of Special Forged Steel
- Depth Stop on Spindle Head
- Ideal for Pulling Out Gears, Pinions, Bearings, and Pulleys
- Replaceable Components with Engraved Numbers
- Robust and Durable Model
- Original KUKKO Design

Specifications

High	8,20
Width	8,20
EAN	4021176016448
Manufacturer	Kukko
Weight (kg)	0,6000
Depth	15,50
