Description

The **Kukko-45-4** is a 3-legged, self-centering bearing puller designed to deliver exceptional performance when removing tightly clamped parts. Measuring **250 x 200 mm**, this model features an innovative automatic grip adjustment system that allows for quick and secure clamping. As the spindle is tightened, the puller's legs adapt to the part being removed, applying an automatically increasing force to ensure an efficient and hassle-free extraction process.

Made from specially forged steel, the Kukko-45-4 ensures superior durability and strength, making it the ideal tool for demanding jobs. Its design includes a depth stop on the spindle head that prevents the wrench from slipping, providing safer and more controlled use.

Furthermore, all components of the extractor can be supplied as replacement parts, thanks to the number engraved on each piece.

- Original KUKKO design
- Automatic grip adjustment
- Quick and self-locking clamping
- Automatically increasing extraction force
- Legs made of special forged steel
- Robust model for firmly clamped parts
- Ideal for gears, pinions, bearings, and pulleys
- Depth stop on the spindle head
- Components available as replacement parts
- Number engraved on each piece for easy identification

Specifications

High	15,50
Width	15,50
EAN	4021176016776
Manufacturer	Kukko
Weight (kg)	4,0000
Depth	32,00
