Description

The **Kukko-45-5** is a 3-legged, self-centering bearing puller designed to deliver exceptional performance when removing tightly clamped parts. Measuring **300 x 250 mm**, this model features an innovative automatic self-centering system for the extraction hooks, ensuring precise and efficient adjustment every time. The spindle head has a depth stop that prevents the wrench from slipping, ensuring safe and controlled operation.

Made with forged special steel legs, the Kukko-45-5 is robust and durable, ideal for removing components such as gears, pinions, bearings, and pulleys. Its unique design allows for quick clamping and automatic locking, facilitating work in demanding environments.

When the spindle is tightened, the legs automatically adjust to the workpiece, generating increasing force that ensures a firm and effective grip.

- 3-Leg Self-Centering Puller
- Dimensions: 300x250 mm
- Depth stop on spindle head
- Components available as replacement parts
- Automatic grip adjustment
- Quick and self-locking clamping
- Legs made of special forged steel
- Ideal for firmly held workpieces
- Use on gears, pinions, bearings, and pulleys
- Original KUKKO design

Specifications

High	19,50
Width	19,50
EAN	4021176815393
Manufacturer	Kukko
Weight (kg)	4,6000
Depth	39,50
