KUKKO 2-Legged Bearing Puller with Side Clamp 90x100 mm

Brand: Kukko

Reference: TUR 204-02

The Kukko-204-02 is a two-legged bearing puller with a side clamp, ideal for recessed parts. Its side screw increases clamping pressure, while the recessed claws facilitate insertion. All components are replaceable.

Description

The Kukko-204-02 is a two-legged bearing puller designed to provide an efficient solution for removing recessed parts. Its innovative side screw increases the clamping pressure of the legs, preventing them from slipping during the extraction process. The puller's teeth are recessed, allowing them to easily penetrate under the part to be removed, thanks to the action of the side screw. Furthermore, the spindle head's depth stop ensures the wrench does not slip, guaranteeing safe and efficient use. This puller is ideal for precision mechanical applications, as well as electrical and pneumatic workshops.

- 2-Leg Bearing Puller with Side Clamp (90x100 mm).
- Side screw that increases clamping pressure and prevents slippage.
- Recessed claws for easy insertion under the part to be removed.
- Depth stop on the spindle head to prevent slippage.
- Components available as replacement parts, identifiable by engraved number.
- Indispensable tool for removing recessed parts.
- Allows for leverage before starting the removal process.
- Ideal for recessed bearings and bearing rings.
- Recommended use in precision mechanics and electrical and pneumatic workshops.
- Robust and durable construction for long-lasting performance.

Specifications

High	7,00
Width	16,00
EAN	4021176339516
Manufacturer	Kukko
Weight (kg)	2,0000

Depth	18,80
