

Product sheet

KUKKO 10 T power hydraulic press, combinable with extraction devices.

Brand: Kukko

Reference: TUR 9-1

The Kukko-9-1 auxiliary hydraulic press offers 10 tons of power and is compatible with various Kukko mechanical pullers. Its design allows for more efficient work without the need to change the spindle, and all components are replaceable.

Description

The Kukko-9-1 auxiliary hydraulic press is a tool designed to optimize the extraction process of firmly held parts, offering a pulling force of 10 tons. Its design allows it to be combined with various mechanical extraction devices from the KUKKO range, making it a versatile and efficient solution for professionals in the industry. Thanks to its interchangeable spindle system, a single press can be used for multiple extractors, thus reducing working time by eliminating the need to change the mechanical spindle.

The Kukko-9-1 stands out for its high power in a compact format, making it ideal for confined spaces. This tool is especially useful for significantly increasing the pressure of mechanical extractors, facilitating the extraction of components that require additional effort.

To ensure safe use and prevent overloading, it is recommended to use only with size 3 or larger pullers.

- Power: 10 T
- Compatible with KUKKO mechanical pullers
- Interchangeable spindles for greater versatility
- Compact design requires minimal space
- Ideal for firmly held parts
- Increases the pressing power of pullers
- Components available as replacement parts
- Recommended use with size 3 or larger pullers
- Robust and durable construction
- Makes work easier and faster

Specifications

High	3,50
Width	7,00
EAN	4021176005053
Manufacturer	Kukko
Weight (kg)	0,8500
Depth	16,00
