Product sheet

KUKKO two-shell internal bearing puller (Ø 10-14 mm)

Brand: Kukko

Reference: TUR 21-02

Kukko-21-02 internal bearing puller, designed for bearings with a diameter of 10-14 mm. Its two-shell design with extra-large edges ensures safe removal. Compatible with counterweights and slide hammers, it includes a grease tube for lubrication.

Description

The Kukko-21-02 is an internal bearing puller designed to deliver exceptional performance in removing internal bearings, outer bearing rings, and bushings with diameters ranging from 10 to 14 mm. Its robust and durable construction ensures a long service life, while its dual-segment design with extra-large gripping edges provides safe and efficient removal. This puller is equipped with an internal safety stop that protects against over-tension and overloading, minimizing the risk of breakage during use. Furthermore, it is compatible with counterweights and slide hammers, making it a versatile tool for a variety of applications. For easy maintenance, it includes a special Kukko grease tube that ensures proper spindle lubrication, thus extending its functionality.

- Working diameter: Ø 10-14 mm
- Two-shell design with extra-large edges
- Internal opening stop for overload protection
- Compatible with counter supports and slide hammers
- Optional 21-V series extensions for deep bearings
- Robust design and high performance
- Long service life
- Internal safety stop to prevent breakage
- Includes special Kukko grease tube
- Ideal for extracting inner bearings and outer rings

Specifications

High	2,00
Width	2,00

EAN	4021176010736
Manufacturer	Kukko
Weight (kg)	0,0800
Depth	10,00
